

CSE 114 - Fundamentals of Computer Programming – 2026 Spring

Hw 3

Write a program which will produce the following output (it is just an example). Assume that the user always enters either two positive odd numbers or two positive even numbers. Exit, if the first one is not smaller than the second. Otherwise continue asking two more numbers.

Do not use break, continue or return!

```
Enter two positive integers (first < second): 3 7
7
5
3
Enter two positive integers (first < second): 4 8
4
6
8
Enter two positive integers (first < second): 5 11
11
9
7
5
Enter two positive integers (first < second): 2 8
2
4
6
8
Enter two positive integers (first < second): 10 6
First number is larger than or equal to the second. Exiting.
```

Submission – Write a single C program for all parts and submit your file with the given format:
name_surname.c
